

# Doctors Worldwide Annual Impact Summary 2016-17

Driven by our belief that good health is a human right, we have worked hard to provide access to quality healthcare and bring good health to poor communities. Millions of the poor lack access to basic healthcare. It creates emotional and financial burdens that leave long lasting scars on families and communities. Poor health doesn't create wealth; only more poverty.

Medical care can be complex and expensive but we've learnt how to deliver low cost high impact services. Doctors Worldwide do a lot. However, without your continued support we can't do anything. We express our appreciation and thanks to you. We invite you to continue to stand alongside Doctors Worldwide and our communities in Pakistan, Kenya, Tanzania and Malawi.

## 1. What We Do
